Prior to the pandemic, the U.S. travel industry experienced 10 straight years of growth due to the strength of the domestic leisure travel, domestic business travel and international inbound travel segments. Travel was a significant economic driver in every region of the country, representing 1 in 10 jobs and generating a travel trade surplus.

TODAY, TRAVEL REMAINS THE HARDEST-HIT INDUSTRY, WITH AN UNEVEN RECOVERY ACROSS ALL SECTORS

Total 2-year direct travel spending losses throughout the end of 2021.

• In 2021, domestic business travel spending remained 56% below 2019 levels and international travel spending remained 78% below 2019 levels

- The U.S. travel industry suffered unparalleled losses amid the COVID-19 pandemic
- While domestic leisure is thriving, the recovery remains uneven across other travel sectors. Domestic business travel and international inbound travel spending remain severely depressed, dragging the overall industry's recovery
- We not only need to get back to pre-pandemic levels but also make up for years of losses. The right policies can return us to the trajectory of growth
