ABOUT COVID-19

COVID-19: GET THE FACTS

- COVID-19, also referred to as ‘coronavirus,’ is a respiratory illness that was first detected in the Hubei province city of Wuhan, China, in late December 2019
- Symptoms include: fever, cough, shortness of breath or difficulty breathing, chills, repeated shaking with chills, muscle pain, headache, sore throat and new loss of taste or smell
- All 50 states and more than 150 countries worldwide now have reported cases of COVID-19
- The virus is spread via person-to-person contact
- For more information guidance, visit coronavirus.gov

CDC RISK LEVEL FOR AMERICANS

Close contacts of those who are infected and people in places where ongoing community spread of COVID-19 has been reported are at elevated risk of exposure, with the level of risk dependent on the location. Based on current information, older adults and people of any age with underlying medical conditions have a higher risk for severe illness from COVID-19. (CDC)

CDC TRAVEL GUIDANCE

- The COVID-19 outbreak in U.S. is a rapidly evolving situation. The status of the outbreak varies by location and state and local authorities are updating their guidance frequently. The White House's Opening Up America Again plan means some parts of the country may have different guidance than other areas. Check with the state or local authorities where you are, along your route, and at your planned destination to learn about local circumstances and any restrictions that may be in place.
- For the latest, visit CDC’s COVID-19 Information for Travel
- Level 3, Avoid non-essential travel. Restrictions on entry to the U.S.: China, Iran, United Kingdom and Ireland, most European Countries (April 28)
- CDC recommends that travelers avoid all nonessential travel to all global destinations. Learn more from the Global Pandemic Notice
- For a comprehensive list of travel alerts visit cdc.gov/travel/notices
- The Department of State has issued a Global Level 4 Health Advisory: Do Not Travel (March 31)
