Travel will power our economic recovery. Why travel matters to Illinois.

In Illinois, as our attractions, hotels, restaurants and more were unable to welcome visitors, our once thriving travel and tourism industry was no longer the significant economic driver it had been.

In 2019:

- Domestic and international travelers spent **$45.5 billion** exploring our state
- For every **$1 million** spent in Illinois by domestic and international travelers, **7.5 jobs are created**
- The **343,255 travel-supported jobs** represented **6.6% of Illinois’s total private industry employment**, without which our unemployment rate of 4.0% would have been **10.3% of the labor force**
- Travel spending generated **$7.8 billion to federal, state and local governments**, which help fund jobs and public programs such as police, firefighters, teachers, road projects and convention centers

**Illinois** experienced severe losses in 2020.

- Spending by domestic and international travelers **declined by 49%**, shuttering many local businesses and putting our residents out of work
- Due to the decline in spending, **federal, state and local tax receipts declined by 41%**, jeopardizing jobs and public programs—which we need more than ever as we work toward recovery
