In **Pennsylvania**, as our attractions, hotels, restaurants and more were unable to welcome visitors, our once thriving travel and tourism industry was no longer the significant economic driver it had been.

In 2019:

- Domestic and international travelers spent **\$30.3 billion** exploring our state
- For every **\$1 million** spent in Pennsylvania by domestic and international travelers, **7.8 jobs are created**
- The **236,196 travel-supported jobs** represented **4.5% of Pennsylvania's total private industry employment**, without which our **unemployment rate of 4.5%** would have been **8.8% of the labor force**
- Travel spending generated **\$3.9 billion to federal, state and local governments**, which help fund jobs and public programs such as police, firefighters, teachers, road projects and convention centers

Pennsylvania experienced severe losses in 2020.

- Spending by domestic and international travelers **declined by 44%**, shuttering many local businesses and putting our residents out of work
- Due to the decline in spending, **federal, state and local tax receipts declined by 36%**, jeopardizing jobs and public programs—which we need more than ever as we work toward recovery
